

make vi colorful <https://mediatemple.net/community/products/dv/204644480/enabling-vi-syntax-colors>

- 1 Browse to your user directory with the following command: **cd ~**
- 2 Create a .vimrc file with the following command: **vi .vimrc**
- 3 Click i for insert mode.
- 4 Type the following command below to enable syntax and give a specific colorscheme. This example uses the desert colorscheme:
- 5 **syntax on**
- 6
- 7 **colorscheme desert**

make terminal colorful

1. **vi ~/.bash\_profile**

```
# Tell ls to be colourful
export CLICOLOR=1
export LSCOLORS=Exfxcxdbxegedabagacad

# Tell grep to highlight matches
export GREP_OPTIONS='--color=auto'

export TERM="xterm-color"
PS1='\[\e[0;33m\]\u\[\e[0m\]@\[\e[0;32m\]\h\[\e[0m\]:\
[\e[0;34m\]\w\[\e[0m\]\$ '
~
```

2. **source ~/.bash\_profile**
